

Abstract of the Disclosure

5 A method of forming an integrated circuit dual gate structure using only one mask is disclosed. In one embodiment, a substrate is prepared for the fabrication of a dual gate structure, a first gate structure having an NWELL is formed without using a mask, and a second gate structure having a PWELL is formed using only one mask. In an alternate embodiment, a substrate is prepared for the fabrication of a dual gate structure, a first gate structure having a PWELL is formed without using a mask, and a second gate structure having an NWELL is formed using only one mask.
